EDUCATION

University of Southern California | Los Angeles, CA GPA: 3.83
B.S. Computer Science & Business Administration Expected May 2028
Progressive M.S. Computer Science | *Minor in Artificial Intelligence Applications*

TECHNICAL SKILLS

- **Programming languages:** Python, C++, Java, Kotlin, HTML, CSS, JS, PHP, SQL
- **Frameworks and Libraries**: Tensorflow, PyTorch, Hugging Face, SpaCy, NLTK, Keras, React, FastAPI
- **Developer Tools:** Git, Docker, Linux, Bash, CUDA, Slurm, Power BI, TensorBoard, Airflow, AWS, Spark

EXPERIENCE

Machine Learning Engineer | **TrueCar, Inc.** May 2026 - Present

- Rebuilt probabilistic ranking of legacy sales attribution algorithm, improving monthly match volume by 196% and accuracy by 19% at over 95% confidence, increasing billable sales by 124% in production
- Authored Apache Airflow DAG to automate 7-day manual process of regenerating probability tables
- Trained an XGBoost model on 52M labeled pairs with 10 target-encoded features, outperforming the naive Bayes baseline: increased Top-1 Accuracy by 59%, AUC-ROC by 30%, and MRR by 29%

Full-Stack Software Engineer | **Counsel Reflect** May 2025 - Aug 2026

- Delivered user experience achieving System Usability Scale scores of 78.8 and 75.2 versus 68-point benchmark, by building React/TypeScript dashboard for session and turn-level counseling analysis
- Integrated 81 model and literature-based metrics by integrating emotion, safety, and factuality evaluators
- Achieved 80–92% accuracy across 3 empathy dimensions by fine-tuning RoBERTa-based classifiers

Data Analyst | **USC Aviation Safety & Security Program** Mar. 2025 - June 2025

- Analyzed 11K+ airplane runway-incursion reports by building an NLP dashboard with LDA and BERTopic
- Identified 105% risk on time-pressure incidents by conducting longitudinal analysis of human-factor trends
- Presented findings to 50+ program representatives by translating insights into actionable interventions

PROJECTS

Tether | VIEW | *C++, Python, PyTorch, CUDA, NVIDIA TensorRT, OpenCV* Oct. 2026 - Present

- Built real-time computer vision system for UAV detection and tracking at 195+ FPS, a 53% speedup, by optimizing with custom GPU inference and image-processing code, cutting image prep time by 9×
- Raised detection rate by 300% at 97.5% precision, by training custom AI model on 17,000+ drone images
- Tracked drones 5× more reliably than baseline YOLO26n over 79k frames with custom tracking algorithm

MyCouncil | VIEW | *Python, Node.js, React, Typescript* Nov. 2025 – Present

- Built AI counseling platform with 16 personas for 1-1 dialogue, debate, and iterative dilemma refinement
- Developed RAG-based long-term memory for multi-agent LLM conversations using semantic search, BGE embeddings, and model reranking, improving relevant context recall by 168% on 160 held-out tests
- Tested end-to-end on 240-case evaluation suite measuring retrieval accuracy, ranking quality, and latency

LEADERSHIP

Teaching Assistant | **Machine Learning Courses (USC)** Jan. 2025 - Present

TAC 259 (Basics of AI) | *TAC 359 (Neural Networks)* | *TAC 449 (ML Applications)* | *TAC 459 (NLP and GenAI)*

- Mentored 100+ students across 90+ projects in unsupervised learning, time-series forecasting, and NLP
- Improved demo runtime by 20% by troubleshooting NLP pipelines and guiding BERT/GPT fine-tuning

Viterbi Undergraduate Student Association (USC) Feb. 2024 - Aug 2026

Co-Chair (May 2025 - Aug 2026) | *Vice Chair (Nov. 2024 - May 2025)* | *Coordinator (Feb. 2024 - Nov. 2024)*

- Oversaw $15K event budget and represented 50+ engineering clubs to the dean, securing critical funding
- Launched first AI ethics panel for 93 attendees by coordinating 4 experts, outreach, and event logistics
